TimbeX[®]

Closer to nature

TimbeX[®]

The brand name TimbeX[®] symbolizes the boundless potential of wood. We firmly believe that wood, as a natural material, has limitless possibilities. Through innovative technology and design, we max out the potential of wood and deliver users a brand-new outdoor deck experience. At TimbeX[®], we're not just churning out floors, we're creating a lifestyle that's in harmony with nature.

How to make your choice?

TimbeX

Can be used in all outdoor environments, no matter cold, hot or moist

Amazingly scratch resistant, you can test with a sharp item to feel its charm

Totally stain proof, even the fresh cigarette butts

Solid core, free you from worries about cracking, splitting., etc.

Moulded from real timber, the best wood-like composite deck ever

Best slip resistant deck

Totally free

Above 1.5mm

Still same bending strength as other composite deck when span is 500mm

No fading, color stays good

Soft underfeet, tough on wear. It's almost silent when you walk on it

Wood

Very picky with the environment

Easily get scratched

Be careful

Needs a lot maintenance, and very short life span

✓

Need to be careful

Take a lot of work

No coating

Depend on board dimensions

Need painting every 1 or 2 years

The sound of footsteps is a little bit obvious

Other composite decks

Adaptable to certain environments, but prone to problems in humid or salty environments

Easily get scratched

Be careful

Those with hollow core is very easy to have cracking or splitting problem

Still can't get rid of plastic feeling

Need to be careful

Better than wood

Normally 0.4-0.6mm

Maximum suggested span is 400mm

About 15%-30% fading

The sound of footsteps is a little bit obvious

Advantage

Scratch

Stain

Durability

Appearance

Slip resistance

Maintenance

Coating

Strength

UV resistance

Sound absorption
